

Built-in 36" fish ruler for quick & easy measuring.

## FishSUP™ FS126 Game Changer for Anglers:

*Provides a wide, stable platform for standing & casting with the ability to use a trolling motor!*

This innovative fishing craft is just about the most practical way to get out where the fish are.

Super rugged because both the top and bottom are two layers of our thickest Drop-Stitch material and our thickest outer fabric. This fishing SUP can take a lot of hard use and abuse.

Easy to set up, easy to cast from, easy to stand up on, easy to motor silently, this is a true game changer. Far wider than other fishing SUPs in order to be far more stable. After all, who wants to worry about balance when catching a big fish? Narrower, more pointed bow allows this SUP to cut through waves. A wider width at stern with three fins provides true stability and tracking.

Best of all, there is plenty of space for coolers, tackle boxes, rods, etc.
