

The **ALL NEW** Sea Eagle® PaddleSki™ Redesigned To Be Better!

PaddleSki™ 437ps

Now with High Pressure
Drop-Stitch Floor
for greater strength,
and superior
motoring performance!

Incredible Range:
Go at full speed
up to 70 miles on
a single 3 gallon tank,
up to 140 miles on
a single 6 gallon tank.

The Only Two Person Kayak that can motor at 17 mph and take you as far as you wish!

The Sea Eagle PaddleSki™ offers many unique advantages over rigid or other kinds of inflatable kayaks..

1. It is unsinkable because of 5 separate air compartments.
2. It's rigid drop stitch floor is above the waterline, making this a true catamaran kayak, providing structural strength, reducing drag and increasing speed.
3. A removable transom to easily hold up to a 6 hp motor allows it to motor FAST!
4. It is easy to stow or store. And it is uniquely portable because it rolls up and packs in its own carry bag.
5. The Sea Eagle PaddleSki is a multi-purpose craft that can be paddled, sailed, motored or fished.
6. The Sea Eagle PaddleSki is the only 14 foot kayak that can be motored long distances at up to 17 mph and still be carried in a car trunk, SUV, RV, flatbed truck or on a small airplane.
7. This is a truly seaworthy craft that can navigate wind, waves and currents with ease and safety.

Yes, you can sail the 437ps!
SailBoatsToGo.com offers a
special sail kit for the 437ps.

What Makes The Sea Eagle® PaddleSki™ 437ps Great!

- It can carry 2 people and hundreds of pounds of gear, yet it rolls up and packs in a bag in minutes to fit in your car trunk.
- The High Pressure, All Drop-Stitch center floor above the water creates a wider, more stable, stronger structure that allows this catamaran kayak to motor with a 6 hp motor at an incredible 17 mph with one person, 15 mph with two persons.
- It has a true center transom that can easily handle 6 hp motor or an electric motor. With a 5 or 6 hp motor, you can go at full speed up to 70 miles on a single 3 gallon tank of gasoline or up to 140 miles on a single 6 gallon tank of gas.
- It weighs just 67 lbs. with the transom and takes up the space of a large duffel bag. So storage is easy and compact.
- Fast and simple setup - just roll out and inflate - 10 to 15 minutes from bag to paddling, motoring, sailing or fishing.
- Fast and simple take-down - just open 5 air valves, remove swivel seats, roll up and stow in bag.
- No need to ever bail. Water simply drains out of the drop stitch floor because transom is open at the corners.
- Very stow-able and very portable - deflates 36" x 21" x 12" and because it weighs just 57 lbs., without the transom / 67 lbs. with the transom - can be rolled up and carried in any car trunk, SUV, RV or flatbed truck.
- Can be used with our EZCart to roll the PaddleSki™ effortlessly from set-up point down to the the put-in point.
- 7 Convenient carry handles - 4 inside the cockpit - 2 for each passenger when motoring at higher speeds - one carry handle at the bow and two carry handles at the stern for two people to pick up and easily walk the PaddleSki™.
- The Sea Eagle® PaddleSki™ can be sailed downwind with our ultralight Sea Eagle® QuikSail™ and motored back against the wind afterwards. Or it can be sailed as a true sailboat with a sail kit from SailboatsToGo.com and motored if becalmed.

**NMMA
CERTIFIED**

Exterior: **14'4" x 48"**
Interior: **11'6" x 21"**
Tubes: **14" Diameter**
Hull Weight: **67 lbs.**

- Can take up to a 6 hp outboard
- Travels up to 16 mph w/ 5 hp outboard
- EZ-Attach on/off seating system
- Completely self-bailing
- Option to use gas or electric motors
- Non-slip EVA foam deck padding
- Anti-splash protective rubbing strake bumper
- High-strength towing D-ring under bow

The All NEW Sea Eagle® PaddleSki™ The Original Inflatable Catamaran Kayak

The Sea Eagle® PaddleSki™ always was a unique craft, truly different in design, always able to do many things - unique in so many ways with almost unlimited advantages and ways to use it!

We have now re-designed this unique catamaran inflatable kayak to be stronger, more rigid and better capable of taking an electric or a gas motor up to 6hp.

The PaddleSki still rolls up, packs in its own carry bag and fits easily in any car trunk, SUV or flat bed truck, even with a gas or electric motor!

1. It now features a rugged transom that allows this catamaran kayak to truly go 17 mph with just a 6 hp engine.
2. Because it takes an electric or gas motor, it can be used on small ponds, inland lakes, wide open bays or seas & oceans...this is a boat that can be motored very long distances almost anywhere there is water.
3. Because it draws only 2 or 3 inches of draft, the PaddleSki can be fished in deep or shallow waters.
4. With a 6 hp motor, the FastCat™ can go 17 mph with 1 person or 15 mph with 2 people.
5. This is the most portable, practical, economical inflatable boat ever designed.

Unique Catamaran Hull Design with High Pressure Drop-Stitch Floor 7" above the bottom of pontoons make this kayak far more efficient.

1 Person Start Up Package with Swivel Seat

- 437ps Hull with Carry Bag
- 1 Locking Swivel Seat
- 1 AB30 Double End Paddle
- High Pressure Piston
