

Explorer™ 300x

The Smaller Solo Explorer for Up Close & Personal Ocean, Lake or Whitewater Thrills

Here's a model that is going to get your juices flowing. This is the ideal one man whitewater kayak. With its 16 drain valves this little kayak drains like a demon and handles steep drops, hydraulics, upstream eddies and even ocean waves as if it was born to the task.

At just 30 lbs., this kayak is lighter than any of our Explorer kayaks. As such, it is easier to transport, easier to stow and easier to carry.

Made of the same super strong 1000 denier reinforced material, this kayak is just as rugged as its larger sisters, the 380x and the 420x. Its smaller size also makes it more responsive and more maneuverable for one person in whitewater.

The Explorer™ 300x is ideal for one person and enough camping gear to stay out on a river for 2 or 3 days.

Skeg for use on flat water.
Remove for use on whitewater rivers.
