

Sport Runabout 10.6sr

Explore Harbors & Zip from Ship to Shore!

The 10.6sr is a nimble craft that motors extremely well in almost all sea and weather conditions. The rounded shape goes faster through the water because there are no angular bends to create drag and break the waves. This little runabout rises instantly up on a plane and provides a silky smooth ride.

The 10.6sr is an ideal tender size for larger boats and for those who want portability and light weight without giving up motoring performance and carrying capacity.

Patented outside Drop-Stitch inflatable keel provides super precise steering for the tightest docking spaces. The light gray and blue colors also make it a handsome boat that can take on a load of supplies and yet look good doing so!

When outfitted with our Drop-Stitch floor with EVA foam footpad it is super light, super portable and is super easy to assemble. Best of all, should it rain when this boat is moored, it will automatically self-bail.

Exterior: 10'6" x 5'5"

Interior: 7'3" x 2'9"

Hull Weight: 78 lbs. Hull
93 lbs. w/ Drop-Stitch Floor
124 lbs w/ Polyethylene Floor

Hull Material: 1000 Denier Reinforced

Tubes: 16.75" Diameter

Inflation & Assembly: 15-25 Minutes

Weight Capacity: 5 Persons or 1200 lbs.

Motor Capacity: 15hp, 125lb. Max Weight,
15" Shaft

Deflated Hull Size:

46"x24"x10" (Hull)
40"x32"x4" (Floorboards)

Standard Features

- NMMA & CE Certified
- Smooth rounded hull shape for less drag and more efficient motoring
- Wide beam hull design for stability and added capacity
- Patented (U.S. Patent #8,286,573 2) outside Drop-Stitch inflatable keel for smoother ride, super precise steering and faster planing
- Choice of maintenance free plastic floorboards for best structural rigidity and best motoring performance or high pressure super strong Drop-Stitch floors for easiest assembly and lightest weight
- Hefty 5/8" grab line running through brass grommets for passengers to grab onto anywhere & a line of double layer of fabric hogging on sides for safety
- Rounded rear pontoons for rapid planing
- Splash guards on transom to prevent water coming back into the boat
- Two large, heavy duty stainless steel D-Rings for easy towing
- Four side carry handles & front lifting handle for easy lifting
- Oars clasp firmly to hull and oarlocks pop up for instant use

- Rubbing strake around hull and under Keel for extra protection
- Two layers of material on lower tubes for greatest abrasion and puncture resistance
- Easy open or shut self bailing drain valve located inside of boat for easy access
- Nylon carry bag, repair kit & printed instructions
